

MYOUNGHEE NOH

Environmental Consultant, CIH, CSP
Myounghee Noh & Associates

RELEVANT PROJECTS

School Renovations, State of Hawaii Department of Education

Supported renovation designers and planners for over 50 public schools in Hawaii. Coordinated and executed targeted hazmat surveys and reporting, specifications, contractors' work plan reviews, abatement project monitoring, and clearance and closeout reports for the DOE and DOH.

NAVFAC Pacific

Served as Environmental Designer of Record and participated in DD1391 preparation, Functional Analysis Concept Designs, and design charrettes, and prepared RFP packages and RFI responses. Prepared technical specifications for the hazardous materials/situation handling and mitigation as part of the Guam and CNMI Military Relocation.

Lenders, Realtors, Insurance Companies

Provided Phase I and II Environmental Site Assessments per ASTM International methods for lenders, insurance companies, or property sellers or buyers. The research and assessments identify risks, therefore help avoid costly mistakes.

Industrial Hygiene Assessment at Kakoi and Keehi Baseyards, Hawaii DOT Highways, Honolulu, Oahu.

Conducted worker and area exposure assessments. Interviewed managers and site workers at each baseyard and observed / assessed industrial activities, including but not limited to welding, cutting, repairing, indoor and outdoor conditions, and machine operations. Collected personal and environmental IH air samples and prepared a report documenting the assessment and recommendations.

ENVIRONMENTAL CONSULTANT

ABIH-Certified Industrial Hygienist (CIH)
BCSP-Certified Safety Professional (CSP)

PROFESSIONAL AFFILIATIONS

Myounghee Noh & Associates, L.L.C. – Woman-owned small business

EDUCATION

Master of Business Administration, University of Phoenix, Honolulu (1997)
Masters of Science, Chemistry, University of Hawaii at Manoa (1991)
Bachelor of Science, Chemistry / Biology, Troy State University (1986)
Aarcher Institute - SPCC Plans: A Practical Approach to Compliance

SPECIALIZED TRAINING AND QUALIFICATIONS

Hazardous Waste Operations & Emergency Response (HAZWOPER 29 CFR 1910.120)
AARST-NRPP Radon Inspector
State of Hawaii Asbestos Professional
State of Hawaii Lead-Based Paint Professional
Stormwater Pollutant Chemistry and Applications to Monitoring and BMP Effectiveness

ROLE

Ms. Noh has over 28 years of experience in management of environmental and laboratory contracts. She founded MNA in 1999 and continues to provide excellence to clients. She is a member of the American Conference of Governmental Industrial Hygienists (ACGIH No. 310411-00), the American Board of Industrial Hygienists (ABIH), and the Board of Certified Safety Professionals (BCSP).

Ms. Noh will serve as Environmental Consultant. Along with the Environmental Engineer, Eunjin Kotkovetz, PE, she will assess the environmental risks and industrial hazards involved in each project. As the principal of Myounghee Noh & Associates (MNA), Ms. Noh will lead MNA and its environmental science and industrial hygiene teams for investigation strategy.

Myounghee Noh is the president and founder of MNA. She is responsible for management of MNA's governmental and commercial sector projects. Ms. Noh has successfully completed a wide range of building types and scales, including public and private school campuses, state and county facilities, airports, Department of Defense (DoD) historic hangars, headquarters, remote camps in Mindanao and Cabanatuan City in the Philippines, radio-tower transmit-receiving sites in Palau, waterfront facilities in Hawaii and Guam, and post-typhoon infrastructure restoration in Saipan and Tinian.

During the past 20 years of 28-year career, Ms. Noh led a team of environmental scientists, engineers, planners, industrial hygienists (IH), and IH Technicians for design and construction support for numerous industrial, commercial, DoD tactical and administration, sports, and educational facilities new constructions, repairs, and improvements. Under her management, existing conditions of the project sites (and adjoining properties as needed) are assessed, investigation reports prepared, findings and risks/recommendations presented to the design team, and RFP/bid documents are prepared. Real and potential site-specific hazards are identified and anticipated, in an effort to avoid costly projects by hazard reduction/mitigation and engineering controls. During construction, site monitoring will ensure that projects are executed in compliance with federal, state, and local regulations and guidelines, and to prevent exposures to the site workers, facility users, and the environment.

Ms. Noh has demonstrated her competence and excellence in conducting environmental studies, investigations, and design and construction services during the 21 years in business. Projects have been completed for these government agencies; the State of Hawaii (DAGS, DLNR, DOA, DOD, DOE, DOT, HPHA), the U.S. Army Corps of Engineers (Honolulu, Japan, and Far East Districts), the Naval Facilities Engineering Commands (Pacific, Hawaii, Marianas, and Far East), U.S. Air Force, U.S. Coast Guard, the Counties of Hawaii, Honolulu, Kauai, and Maui, and other clients including Kamehameha Schools and Charter Schools.
